# GenCyber Students Camp 2018 at Oakland University

The GenCyber camp at Oakland University is a comprehensive and activity-based summer camp program that delivers substantive cybersecurity training to **upper elementary, middle school, and high school students in Detroit Urban Area (Macomb County, Oakland County and Wayne County)**. The camp does not require any prior cybersecurity and computer knowledge or experience, or prior GenCyber camp participation. Since cybersecurity is playing a more and more important role in economy and society, it is very important for the students to learn in cybersecurity to succeed in this world. The camp divides students into three categories according to their grades (exiting) for total of three weeks (<u>one week offered for each applicant</u>). This summer camp program has a lot of activities that will benefit the students' personal life, economy, and society of the Detroit Urban Area and the United States.

**Please apply here:** http://www.gencyber-ou.org
